

## Mission

To create a one-stop shop for housing information and needs in the Borough of Pottstown. As a housing connector, we work with the larger community to preserve and create housing options for every income level and to prepare families and individuals for financial stability and homeownership, knowing that people have better life outcomes when their housing needs are met and stable.

As collaborative partners, we believe the strength of this coalition depends on harnessing and blending the resources of developers, landlords, investors, housing agencies, and non-profit organizations. Through our networks, we will facilitate information for and provide access to housing solutions, community development, training and technical assistance, and act as an advocate at local and state levels for people in need of housing.

## Coalition Task Forces
